U. S. BANK WILL BE GREATEST IN WORLD

New Currency System Will Be Backed by Resources of Twenty Billions.

By JUDSON C. WELLIVER.

That the greatest panking institution the world has been created by the asage of the new banking-currency e brought together in .his gigantic coperation and co-ordination of financial esources, is now assured.

The authorities of the Treasury have passed from the attitude of hope and onfidence, to that of certainty. The new banking system, viewed as a great nity-and every effort of the Administration will be directed to make the world so regard it-will have within two or three years a total paid-up capital of about \$200,000,000.

Resources of Twenty Billion. It will represent consolidated and co-

operating banking resources of about twenty hillions of dollars. its paid-up capital will be greated than the combined capital and surplus

of the Bank of England, the Bank of France, the Imperial Bank of Germany, and the Bank of Russia. It will represent a gold stock of about one billion four hundred millions, which s about 80 per cent of the combined

old holdings of the Bank of England,

a struggle to make the greatest tems firm by accumulating the greatest possible stocks in gold, and by adopting such financial systems as will enable them most certainly to retain that gold, and also to utilize it most effectively in the conduct of their business, as all, jury trail demanded; Robert Hess, and the maintenance of their insufficient evidence; Samuel H.

The United States long has possess the content states long has possessed the greatest gold stook, but the one least readily available for effective utilization. Under the new system that great gold store, piled in the vaults of the Treasury building and held in the strong boxes of our banks, will have the breath of life breathed into it; will be made available as never before or the maintenanc of th national fiscal postion and its constant strengthening. But this does not suggest all the possibilities of the 1ew bank—for in the real, final analysis it is in effect the new Bank of the United States. The new banking system will have a sap tal representing 6 per cent of the combined capital and surplus of all the national and State banks and loan and trust companies that affiliate them-selves with it. The applications for membership thus far have been such as to insure that practically all these banks will come into the system. True, some of the State laws are such that their State banks and trust companies cannot become owners of stock in the new establishment until the State laws are modified. But these modifications will be made as fast as the legislatures meet. It is now confidently calculated that practically the entire list of na-tional and State institutions which are permitted to join the new system will do so.

Enormous Resources. When they have all joined, what will be the capital and the resources of the new national reserve system?

Here are the latest and best figures on the capital, surplus and resources of the three classes of banks that may join the new system: Cap. and Surp. Resource National...... \$1,781,000,000 \$10,876,000,00 \$10,876,000,500 4,000,000,000 5,000,000,000 679,600,000 Trust comp's. 897,090,000 Totals..... 3,357,000,000 19.876,000,000 The nominal capital zation of the new Bank of the United States—that is, the aggregation of regional banks under the Reserve Board—will be 8 per cent, then,

of \$3,357,000,000, or a little over \$200,000,000. What such a paid-up capitalization means as an eaginery of finance, may be judged by comparing this figure with the capital and surplus statements of the four great European banks already

CAPITAL, \$1,000,000. EARNED SURPLUS, \$1,000,000.

Choose Your Bank as You Choose Your Friends.

Consider the character of its policy - its former record-its present standingthe character of those managing its affairs - assure yourself that it is worthy of your confidence before giving your money into its keeping.

If you take these precautions, there is a reasonable certainty that you will consider this an excellent bank for your money.

Behind this stable old institution there stands a record of satisfactory banking service covering a period of nearly half a cen-

FINANCIAL

The Safest Investments Are those that do not fluctuate during dis-turbed conditions of the money or stock man-kets. First deed of trust notes (first mori-sages), well secured on real testate in the District of Columbia, constitute "gift-adge" investments. They do not depend upon the financial responsibility of individuals or cor-perations for their stability, and are exampt from taxation as personal property. We can supply such investments in amounts from 1500 upward. Send for bookist. "Concerning Loans and Investments" SWARTZELL, RHEEM &
